J.J. EMERSON

UNIVERSITY OF CALIFORNIA IRVINE
DEPARTMENT OF ECOLOGY AND EVOLUTIONARY BIOLOGY
CENTER FOR COMPLEX BIOLOGICAL SYSTEMS
321 STEINHAUS HALL
IRVINE, CA 92697
E-MAIL: jje@uci.edu PHONE: (949) 824-9527

EDUCATION/ACADEMIC POSITIONS

Current	Assistant Professor, Dept. Ecology & Evolutionary Biology, Center for Complex Biological Systems, University of California Irvine
2010-2013	Postdoctoral Fellow, Integrative Biology, University fo California Berkeley (Advisor: Doris Bachtrog)
2006-2010	Postdoctoral Fellow, Genomics Research Center, Academia Sinica, Taipei, Taiwan (Advisor: Wen-Hsiung Li)
2000-2006	PhD Ecology & Evolution, University of Chicago (Advisor: Manyuan Long)
1996-2000	BA Biochemistry/Ecology & Evolution, Rice University

PUBLICATIONS (REVERSE CHRONOLOGICAL ORDER, * INDICATES EQUAL CONTRIBUTION, † INDICATES CORRESPONDING AUTHOR)

21. Chakraborty, M.†, Zhao, R., Zhang, X., Kalsow, S., and **Emerson, J.J.**† 2017; Extensive hidden genetic variation shapes the structure of functional elements in *Drosophila*. **bioRxiv**, 114967.
20. **Emerson J.J.**†, Evolution: A Paradigm Shift in Snake Sex Chromosome Genetics. **Current Biology** 2017; *27*, R800–R803.

RESEARCH APPOINTMENTS & AWARDS

1. Academia Sinica Distinguished Postdoctoral Researcher Fellowship (2007-2008)
2. National Science Foundation Doctoral Dissertation Improvement Grant (2001-2005)
3. GAANN training grant appointment (Evolutionary Genomics), U. Chicago Dept. Ecology and Evolution (200-2003).
4. National Science Foundation Graduate Research Fellowship Award (2001)
5. Huxley Award for Excellence, Dept. of Ecology & Evolution, Rice U.
6. National Science Foundation Graduate Research Fellowship Honorable Mention (2000)
7. Magna Cum Laude, Rice University (2000)
8. National Science Foundation REU Fellow (Biological Sciences), Rice U. Dept. Ecology and Evolution (1999-2000)
9. Keck Center for Computational and Structural Biology Undergraduate Research Trainee (1998)

INVITED TALKS

1. 9/13/2016, Cornell University: Beneath the tip of the iceberg: using high quality genomes to uncover the evolutionary consequences of hidden genetic variation in *Drosophila*
2. 9/12/2016, University of Rochester: Beneath the tip of the iceberg: using high quality genomes to uncover the evolutionary consequences of hidden genetic variation in *Drosophila*
3. 3/19/2015, Michigan State University: Evolution and novelty: exploring adaptation from the perspectives of experimental evolution and population genomics
4. 6/19/2013, Pomona College (Claremont Colleges) HHMI Summer Colloquium: Unraveling sex chromosome differentiation in snakes using high throughput sequencing
5. 12/6/2010, Univ. of California Davis: Population genomics of two model systems: variation in cis & trans regulation in yeasts and sexual antagonism in *Drosophila*
6. 4/9/2009, Univ. of California Irvine: Population Genomics in Model Systems
7. 4/1/2009, Rice University: Population Genomics in Model Systems

8. 2/17/2009, The Graduate University for Advanced Studies, Kanagawa, Japan: Evolution of Genomic Novelties
9. 8/20/2008, National Chung Cheng University, Chiayi, Taiwan: Integrating Computer Science, Biology and Statistics (An example from genome evolution)
10. 6/12/2008, University of Bergen, Norway: Natural selection shapes genome wide patterns of copy number polymorphism in *Drosophila melanogaster*
11. 6/10/2008, University of Oslo, Norway: Natural selection shapes genome wide patterns of copy number polymorphism in *Drosophila melanogaster*
12. 9/13/2006, University of Texas at Arlington: Copy number variation in *Drosophila* sister species.
13. 7/17/2005, National Institutes of Health: Gene Traffic in Eukaryotic Sex Chromosome Evolution.
14. 2/25/2005, Am Chem Soc of Chicago: Gene Traffic in Vertebrate Genomes: Examples from Chicken and Mammals
15. 11/29/2004, Rice University: Gene Traffic in Sex Chromosomes

SOCIETY TALKS

1. 7/2013, Society for Molecular Biology and Evolution: Using Experimental Evolution Data to Improve Models of Phenotypic Adaptation.
2. 6/2007, Society for Molecular Biology and Evolution: Natural selection shapes genome-wide levels and patterns of copy number polymorphism in *Drosophila melanogaster*.
3. 5/25/2006, Society for Molecular Biology and Evolution: A genome-wide survey of copy number polymorphism in *D. melanogaster* and *D. simulans*.
4. 6/19/2004, Society for Molecular Biology and Evolution: Extensive gene traffic on the mammalian X chromosome.

POSTERS

1. 3/30/2011, *Drosophila* research conference: Natural variation and sexual antagonism in *Drosophila* species.
2. 7/6/2010, Society for Molecular Biology and Evolution: Natural selection on *cis* and *trans* regulation in yeasts
3. 3/30/2006, 47th Annual Drosophila Research Conference, Houston, TX. A genome-wide survey of copy number polymorphism in *D. melanogaster* and *D. simulans*.
4. 1/26/2004, IGERT Evolutionary Genomics meeting, University of Arizona. Extensive gene traffic on the mammalian X chromosome.
5. 6/2001, Society for the Study of Evolution. Grouping between related and unrelated individuals in the primitively eusocial wasp, *Polistes dominulus*.
